

Next generation cloud security to secure remote workforces.

Empower remote workers and protect company data — without sacrificing productivity.

A trusted partnership and industry leading solution.

Forcepoint and Equate Technologies are working together to protect Queensland businesses; increasing the security of remote workforces and improving the protection of company data and IP.

Implemented by the team at Equate and trusted by thousands of organisations across the globe, the Forcepoint Cloud Web Security solution offers comprehensive application security controls and advanced functionality.

Protect roaming users from advanced threats

Extended web protection for roaming users, with global coverage from the industry's only certified global cloud infrastructure (ISO 27001, 27018, CSA STAR); protecting users from advanced threats.

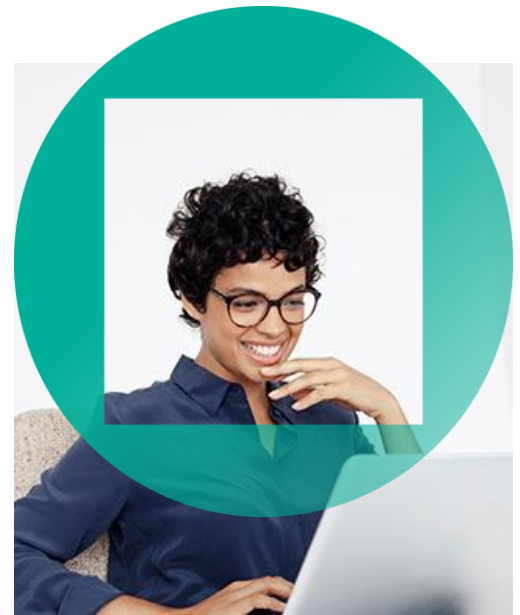

Empower your anytime, anywhere workforce

Forcepoint's patent-pending Direct Connect Endpoint™ technology allows for unparalleled speed and connectivity for remote and roaming users, eliminating latencies with a proxy-less endpoint.

Unrivaled threat protection with Forcepoint ACE

Forcepoint's Advanced Classification Engine (ACE) identifies threats with over 10,000 analytics, machine learning, behavioral baselines, and other advanced techniques maintained through real-time global threat intelligence.

Humans Are the New Perimeter.

Our unique web security features include;

- Integrated CASB
- Internet access expansion for remote users
- Policy extension to mobile devices to prevent malware, spoofing, phishing and more
- Cloud sandboxing to eliminate false malware
- Enterprise grade DLP functionality
- Visibility and control of shadow IT
- Real time reporting
